

# Project BEATRA Environmental Education and Conservation Activities

1. Meet specific conservation or development goals.
2. Learn from actions. Change to what works.

## Strategies:

1. Learning program (adaptive management)
2. Replacement activities (economic incentives)
3. Basic education about ecosystem
4. Involve community in data collection (monitoring, census, etc.)

**Park  
or  
Protected  
Area**

*\* NOTE: If local people benefit economically from using natural resources, they will act to conserve them.*

**Communities**

**Internal  
Threats**

**Promote Biodiversity**

**External  
Threats**

**Outsiders using  
natural resources**
